

# P&C Revision 2021-2023

## Crop Protection Working Group

---

### Members

Name	Organisation	Bio
Dileep Kumar	PAN India	Dileep is currently working as Assistant Director to Pesticide Action Network (PAN) India which is a not-for-profit, public interest research and advocacy organisation in India that works on pesticides and related issues. He holds a post graduate diploma in Zoology in Pesticide Risk Management. Over the past years, he has traveled across India and conducted field studies to understand the ground reality of pesticide use and its public health and environmental impacts. His publication and technical inputs cover topics including pesticide use, pesticide regulation, pesticide poisoning, environmental and ecosystem impacts, agroecology and sustainable development goals. Since 2019, he has been participating in the Basel, Rotterdam and Stockholm (BRS) Conventions as an NGO observer.
Fábio Antônio Carneiro	ABRAPA	Fábio is the manager of social and environmental certification protocols in Brazilian cotton large farms. He is the technical and commercial attendance of BCI accounts to 350 farms and trading companies. Fábio is graduated in agronomy with specialization in Brazilian agribusiness and agricultural sustainability.
Dr. Narasimha Reddy Donthi	Independent consultant	Dr. Narasimha Reddy Donthi has been a passionate campaigner on environmental and development issues. He has contributed to public discourse and policy changes in electricity, seed, rice, cotton, sugarcane, sericulture, handloom and textiles, land, water and other related areas. He built campaigns, advocacy programmes and policy change projects. He is an author, writing on different subjects in regional,

		national and international publications. He also guides students on their Ph.D and other research activities.
<b>Paul Jepson</b>	Independent consultant	Paul is an ecologist who has worked throughout the world on IPM and pesticide risk management with many farming audiences. His research focuses on pesticide risks across multiple scales, and he has published extensively on pesticide impacts to beneficial insects. His recent work has included a project documenting pesticide risks and IPM needs of farmers in West Africa, and also among farmers experiencing fall armyworm outbreaks in Africa and Asia; he is currently working on pesticide management issues in complex supply chains, and he has published a global pesticide selection guideline in Lancet, Planetary Health. He leads a pesticide risk reduction workgroup in the Western USA, and designs and conducts extension education programs in IPM and risk reduction. Paul has recently worked with USAID, the USDA FAS, and the UNFAO, as well as several international agricultural research centers, and he collaborates closely with Rainforest Alliance and the Sustainable Agriculture Network.
<b>Rob Crothers</b>	Cotton Australia	Rob has been recently promoted to the position of Cotton Australia's myBMP Manager (Best management practice program) and subsequently oversees the BCI program in Australia. Prior to that he was a Regional Manager for Cotton Australia working closely with growers to achieve their myBMP accreditation. He spent 19 years working for Pioneer Seeds in multiple roles including Regional Manager, and National Corn and Sorghum product lead. Rob also grew up on a multi crop farm which he managed for 10 years before taking up a role as a sales Agronomist.
